

Illinois

Illinois General Comments

- Relocating of an Operational Headquarters and field operating agencies takes advantage of Rock Island's capacities while maintaining its industrial and storage capability. It exemplifies the Army's intent to gain multi functional installations in support of a transforming Army.
- Closing Reserve Component facilities is offset by the construction of modern Armed Forces Reserve Centers that will be the right size and design to support Guard and Reserve units that will be stationed there. Transforming RC facilities in Illinois will improve training, readiness and quality of life for more than 915 RC soldiers, full-time unit support personnel, and their families.
